EXAMINER'S AMENDMENT

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on July 6, 2006, Herbert F. Ruschmann requested an extension of time for THREE (3) MONTHS and authorized the Director to charge Deposit Account No. 10-1250 the required fee of \$1020 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification:

The specification reads as set forth on the attached replacement copy of the previously submitted substitute specification entitled "Substitute Specification" (this replacement copy was needed to correct an informality in the previous copy filed 10-20-2005 which was entered but was not fully legible due to the presence of a lightened vertical line about one inch from the right margin of each page). The required copy with markings as well as statement that it not contain new matter were provided with the 10-20-2005 response (the statement that it did not contain new matter was also repeated in the remarks accompanying the 7-6-2006 facsimile transmission which was made of record as an attachment to the Interview Summary Record).

In the claims:

The claims have been amended as shown on the attached pages entitled "Claim Listing of Claim Amendments Authorized During July 6, 2006, Interview".

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

With the above-noted amendments to the claims, the 35 USC 112, first and second paragraph rejections from the final rejection have been withdrawn and the claims are in condition for allowance. It is additionally noted that the 35 USC 112, second paragraph rejection of claim 2 (concerning what was previously considered an internal inconsistency in defining a sensor displaced from a position of initial contact to detect a position of initial contact) has been withdrawn upon reconsideration in light of the amendments to the claims and applicant pointing out during the July 6, 2006 interview that the "first detection position" is a position on the surface of the drum (and thus movable with the drum) and is distinct from the now defined "first position" at which the first strip end sensor is directed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
